SOLUTION BUILDERS®

CYBERSECURITY AWARENESS MONTH 2026

03

PART 3 OF 3

The Solution.

Security that works in layers, run by people who do this all day. It is the S in RISE.

99%+
of identity attacks stopped by modern MFA

87%
fewer risky clicks after a year of training

$1.93M
lower breach cost with security AI and automation

01 The Problem

02 The Alternatives

03 The Solution

SIX LAYERS, ONE PLAN

No single tool saves you. Layers do.

Each layer answers a threat from Part 1. An attacker has to beat all of them. You only need one to hold.

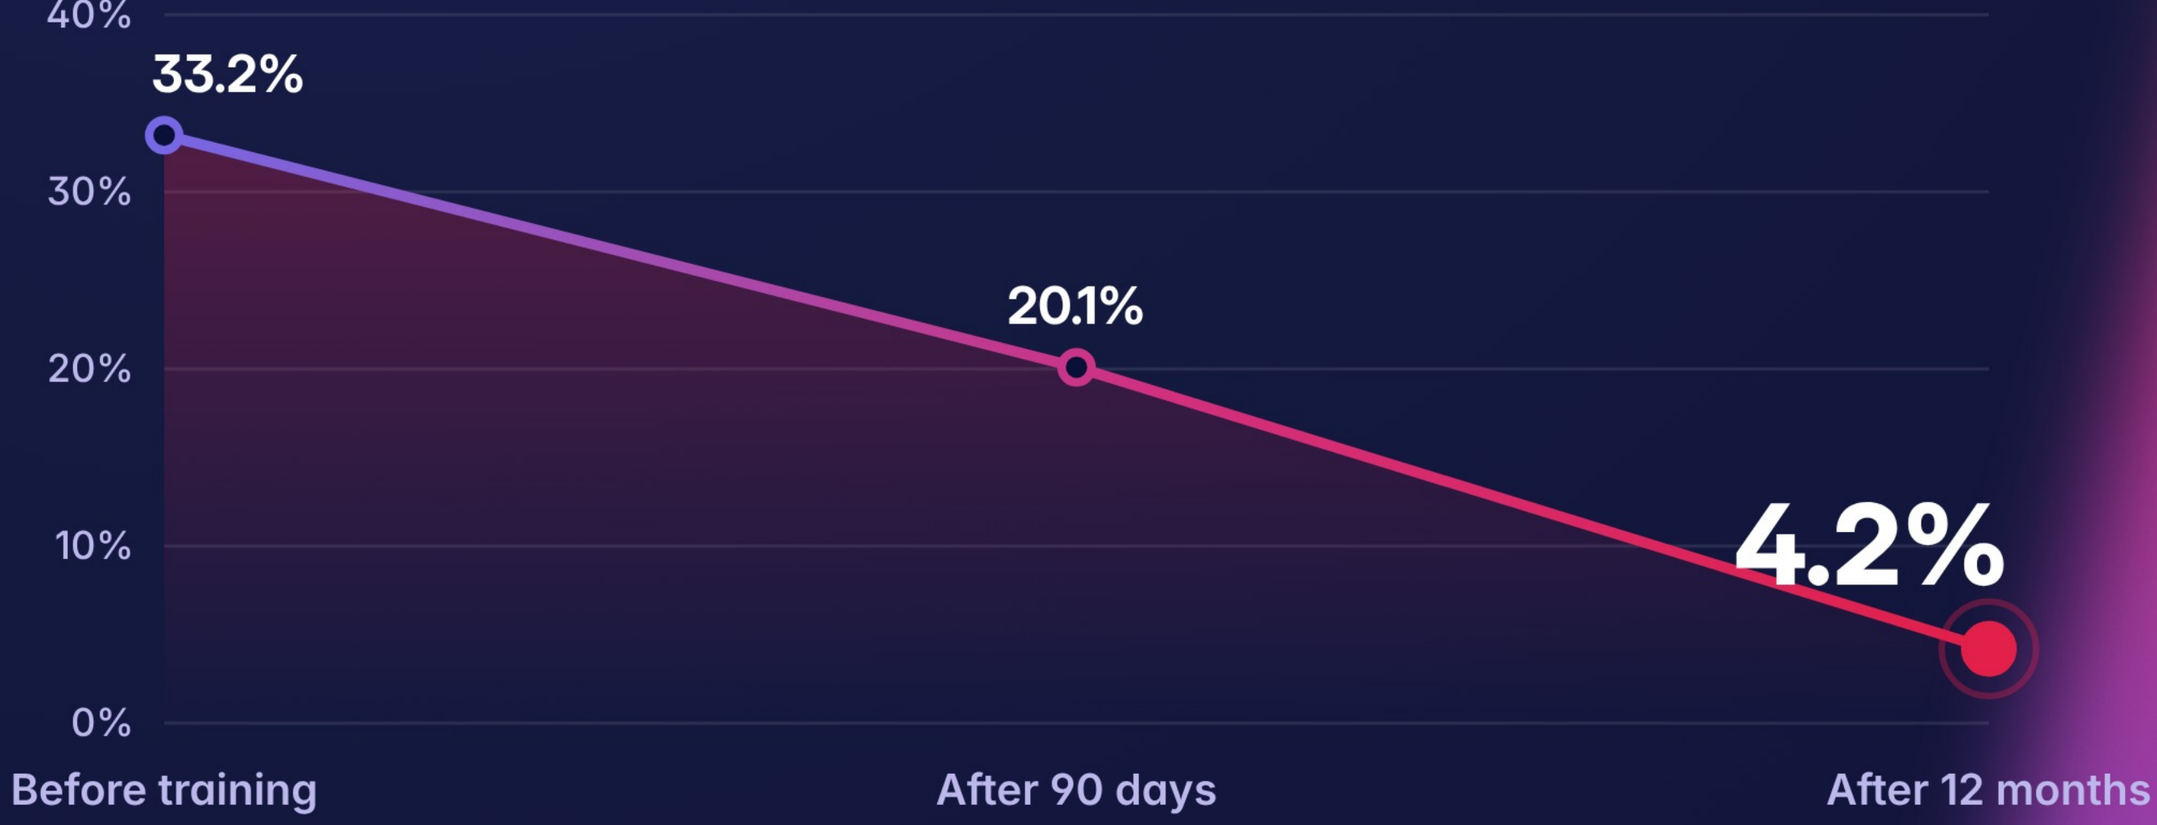

THE LAYER		THE THREAT IT ANSWERS
01	**Identity and MFA** Stolen passwords stop working on their own.	**97%** of identity attacks are password attacks
02	**Endpoint detection and response** Catches what antivirus misses, on every device.	**48%** of breaches involve ransomware
03	**Email security and trained people** Your team spots the bait before they bite.	**62%** of breaches involve a human
04	**Patching and hardening** Known holes get closed in days, not months.	**31%** of breaches start at an unpatched flaw
05	**Backup and recovery** Three copies, two media types, one off site, tested.	**69%** of ransomware victims do not pay
06	**24/7 monitoring and response** Real analysts watching while your office sleeps.	**52%** were targeted on a weekend or holiday

THE PROOF

Put the layers in place and the numbers move.

EMPLOYEES WHO CLICK ON A SIMULATED PHISHING EMAIL

99%+

of unauthorized sign in attempts are blocked by modern MFA

87%

drop in risky clicks after one year of steady training

$1.93M

lower breach cost with security AI and automation used extensively

65 days

faster to find and contain a breach

69%

of ransomware victims did not pay. Tested backups make that possible.

HOW WE DO IT

Your first 90 days with Solution Builders.

DAY 1

Assess

We map your gaps and risks and explain them in plain English.

DAY 30

Harden

MFA, endpoint protection, and patching rolled out across the company.

DAY 60

Watch and train

24/7 monitoring goes live and your team starts short, regular training.

DAY 90

Test and report

Backups restored for real, defenses tested, results on one page.

A typical engagement. Your plan is built around your business.

30+
years helping businesses move forward, since 1995

Top 1%
of managed service providers nationwide

98%
average client satisfaction across support tickets

24/7
security operations center, monitoring and response

22
MINUTES

REAL OUTCOME · PROFESSIONAL SERVICES FIRM, 42 USERS

Ransomware attack contained in 22 minutes. Zero ransom paid.
Full restoration overnight, fully operational by Monday.

YOUR NEXT MOVE

Ready to see where you stand?

Book a free discovery session with a Solution Builders security architect. No pressure, just a plan.

01	**The Problem**	Record losses, record breach costs, and AI in the mix.
02	**The Alternatives**	Four options that react, and one that prepares.
03	**The Solution**	Layers, people, and a partner who is always on.

SECURE IS THE S IN RISE

R
Resilient
Cloud, continuity, backup

I
Integrated
Infrastructure, services

S
