SOLUTION BUILDERS®

RISE · The Resilient Edition

Work anywhere. Win everywhere.

The productivity math behind a resilient, flexible business, any place, any time, any device, on a well architected Microsoft 365.

THE HEADLINE NUMBERS

Flexibility pays for itself.

When your people can work from anywhere on any device, output goes up, downtime stops hurting, and hiring gets easier. Industry research keeps landing on the same story.

+13%
PRODUCTIVITY LIFT REPORTED FOR REMOTE CAPABLE TEAMS

2.5x
FASTER RETURN TO WORK AFTER DISRUPTION WITH CLOUD FIRST SETUPS

98%
OF WORKERS WANT THE OPTION TO WORK REMOTELY

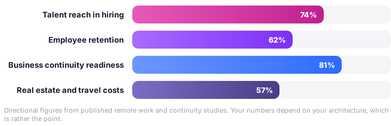

Figures reflect widely reported industry research on remote capable knowledge work, compiled 2024 to 2026.

A POWERFUL REMOTE WORKFORCE

Where the gains come from.

Resilient teams do not just survive working remotely, they get faster. Here is what leaders consistently report improves when the environment is architected right.

Share of organizations reporting improvement

Directional figures from published remote work and continuity studies. Your numbers depend on your architecture, which is rather the point.

REDUNDANCY AND RISK MANAGEMENT

Safety is a productivity feature.

Downtime is the most expensive meeting your company will ever hold. A resilient architecture treats every critical system as replaceable in minutes, not days, starting with the rule that has protected data for decades.

3
Copies of your data
Production plus two backups. One copy is never a plan, it is a hope.

2
Different media types
Cloud and local, so one failure mode cannot take both.

1
Copy stored off site
Geography is redundancy. A flooded office should cost an afternoon, not your data.

The catch nobody talks about

Having a backup is not the same as having a backup that works. The only backup you can trust is one you have **tested by actually restoring it**. We rehearse recovery on a schedule, so the real thing is boring.

FILES, EVERYWHERE YOUR TEAM IS

One file system, zero versions of the truth lost.

An easily accessible online file system turns sharing and collaboration from an email chain into a live document. On Microsoft 365 that is SharePoint and OneDrive doing the heavy lifting.

Files reachable from any device, anywhere, with versioning on by default

Teams that co author in the cloud report far fewer attachment chains

Live co authoring and comments cut document turnaround dramatically

Co authoring figures are directional, drawn from published collaboration research.

UNIFIED COMMUNICATION

Rich media, real time, one place.

A solid unified communication system means chat, calls, video, screen share, and files live together, so the conversation and the work never separate. For our clients that system is Microsoft Teams, architected properly.

THE MOMENT	THE OLD WAY	THE RESILIENT WAY, ON MICROSOFT 365
Quick question	Email thread, 4 hour wait	**Teams chat, answered in minutes with the file attached**
Team standup	Conference line, someone always locked out	**One click Teams video, recorded and transcribed automatically**
Client presentation	Deck emailed the night before	**Live screen share, co presented from two cities**
Project handoff	A zip file and good luck	**A Teams channel with the files, the history, and the people**
Office unreachable	Work stops	**Nobody notices. Sign in from home, the site, or the road**

THE PLATFORM UNDERNEATH

Microsoft 365, well architected.

Microsoft 365 is the backbone of the resilient workplace, but only when it is set up by people who know it deeply. That is exactly what Solution Builders does all day.

CAPABILITY	WHAT IT GIVES YOUR TEAM
Teams	Unified chat, calling, video, and rich media collaboration in real time
SharePoint + OneDrive	The always on file system, shared, versioned, and reachable anywhere
Entra ID	One secure identity for every app, with multifactor protection built in
Intune	Any device, managed and safe, from company laptops to personal phones
Exchange Online	Email that lives in the cloud, not on a server in a closet
M365 Backup, unlimited	Every mailbox and file, retained indefinitely and fully managed by us

R Resilient · **I** Integrated · **S** Secure · **E** Evolving

SOLUTION BUILDERS®

RISE · R is for Resilient

Your resilient business starts with one conversation.

We architect, migrate, and manage the whole stack, Microsoft 365, backups, devices, and connectivity, so your business keeps moving no matter what the day brings.
